Usage

- Used to examine reference-coding properties provisional and conditional clauses
- A provisional clause (*e-ba*) presents one event as being connected to another, roughly meaning ‘when *S1, S2*’ or ‘because *S1, S2*’
- Eg: 友達 が 行けば、わたし は イベント へ 行きます。 (tomodachi ga ikeba watashi wa ibento he ikimasu)

  friend NOM go-PRO I TOP event DIR go

  “If my friend is going I will go to the event”

- Question: In the provisional clause, can the overt subject of the S2 clause appear in front of the S1 clause (and thus S1 is embedded inside of S2)?
- Answer: YES
- “…based on around 900 examples. A Provisional S1 is embedded within an S2, though it is quite ‘high’ within S2.” (Russell et. al, 2013b, p1)

  [S2 [S1 masurawo-no ei ywobi-tate-sikaba] sa-wosika-noi muna-wake-yuka-mu ]

  fine.man-GEN call-stand-PAST.PROV PFX-buck-GENi breast-divide-go-CONJECTURAL

  "The buck must be pressing through (the brush) because the fine men flushed it out.” (MYS 20.4320)

<td><strong>Description</strong></td>
<td>The Oxford Corpus of Old Japanese (abbreviated OCOJ) is a long-term research project which aims to develop a comprehensive annotated digital corpus of all extant texts in Japanese from the Old Japanese period. Old Japanese is the earliest attested stage of the Japanese language, largely the Japanese language of the Asuka and Nara periods of Japanese history (7th and 8th century AD). This is the formative literate period upon which the development of Japanese civilization is based, and these texts are of paramount importance for the study and understanding of the origins and development of civilization of Japan, including language, writing, literature, religion, history, and culture.</td>
