

**Usage of Indonesian
possessive verbal predicates:
a statistical analysis based on
questionnaire and storytelling
surveys**

David Moeljadi

APLL-5 Conference, May 4-5, 2012
SOAS, University of London

The scope of discussion

- **Indonesian:** high and low varieties
- **Possessive verbal predicates:** 'have-constructions' (Heine 1997)
- synchronic study

Previous studies (1)

1. Hopper 1972: 137-140

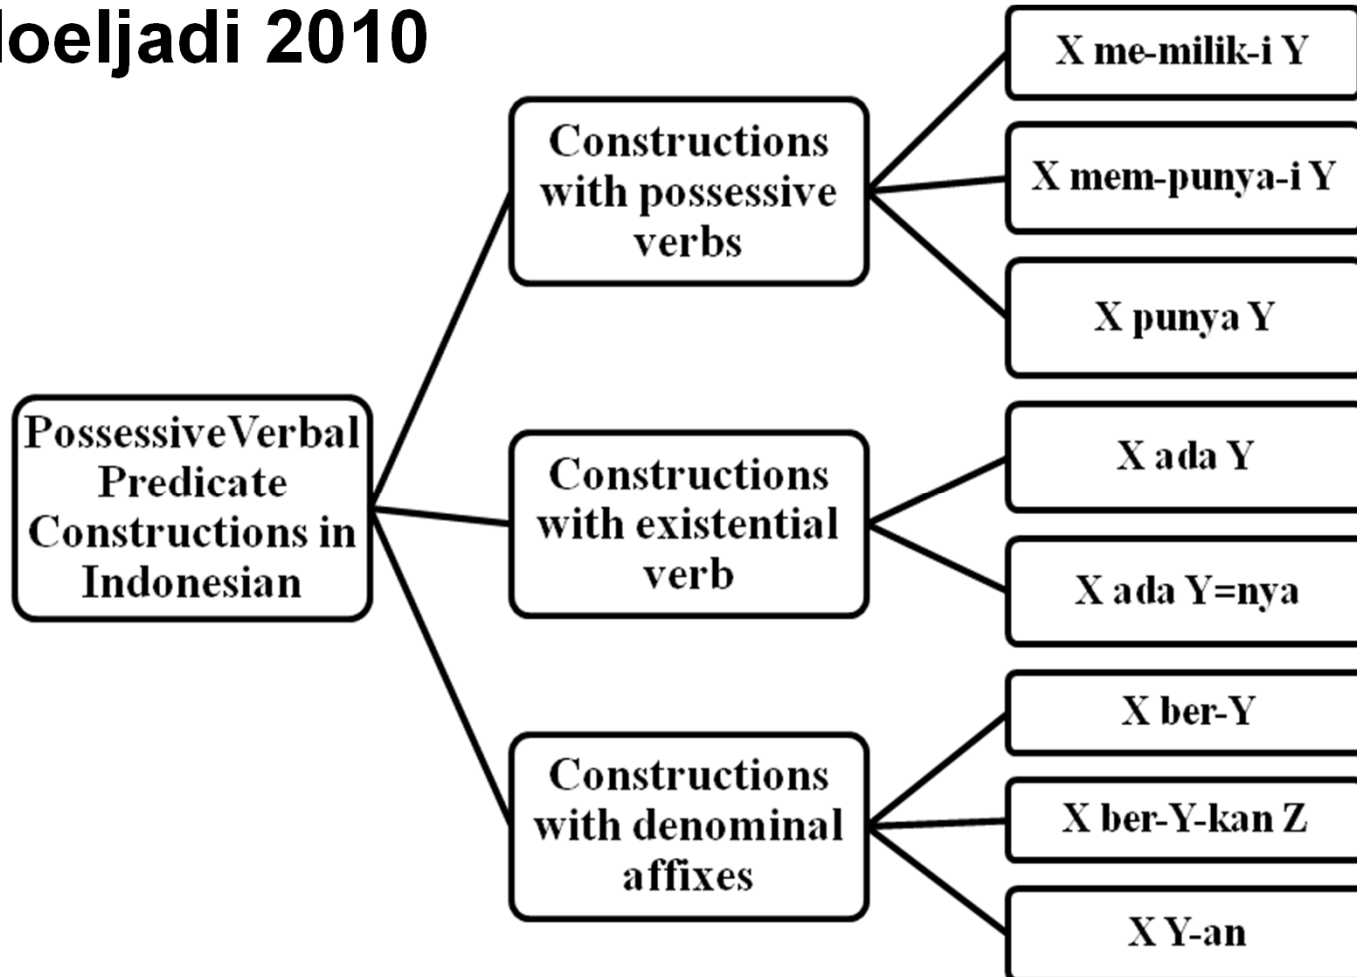

mempunyai, punya, ada (?)

2. Alieva 1992: 15-19

(mem)-punyai, (me)-miliki, punya,
ada, ada ...=nya, ber-, ber-...-kan

Previous studies (2)

3. Moeljadi 2010

X=possessor, Y=possessee, Z=complement

Questions

1. Which possessive verbal predicates can be considered as the real possessive verbal predicates in Indonesian?
2. Does the encoding of possessor and/or possessee play role in the encoding process of possessive verbal predicates?
3. Can we group those possessive verbal predicates?
4. Are there possessive verbal predicates which are commonly used in the high variety and which are often used in the low variety?
5. Is there any special characteristics of possessive verbal predicates in the high and low varieties?

Methodology

1. Questionnaires (interviews)

- > Calculating the degree of similarity between constructions
- > Clustering/classifying
 - * Cluster analysis

2. Storytelling

- > Gathering spoken and written data
- > Calculating the frequency of usage for each possessive verbal predicate
 - * Correlation technique etc.

Overview of possessive verbal predicates in Indonesian

1. memiliki, mempunyai, punya

see examples (4-1)~(4-9)

2. ada, ada ...=nya

see examples (3-1), (3-3), (4-10)~(4-12)

3. ber-, ber...-kan, -an

see examples (3-2), (4-13)~(4-18)

Questionnaire survey (1)

Time and place:

- (1) June 2010 in Tokyo
- (2) September 2010 in Malang
- (3) March 2011 in Jakarta

Consultants: 18 persons (see Table 3)

What to do: Judge the acceptability of possessive verbal predicates in combination with various possesseees and possessors

Questionnaire survey (2)

- **1968 sentences:**

6 possessors: 1, 2, 3 SG/PL

8 possessive verbal predicates (Moeljadi 2010)

41 possesseees

- **Examples:** saya '1SG' **memiliki** buku 'book',
Anda '2SG' **memiliki** buku, dia '3SG' **memiliki**
buku, ... mereka '3PL' **memiliki** buku, saya
mempunyai buku, ... mereka **mempunyai** buku,
aku '1SG' **punya** buku, ... kalian '2PL' **punya**
buku, ... aku **ada** buku, ... dia **ada** bukunya, ...
mereka **berbuku** ...

Cluster analysis

- **3 choices of judgment:**
 - (1) usual and acceptable (1 point)
 - (2) slightly unusual but still acceptable (0.5 points)
 - (3) unusual and unacceptable (zero)
- **Example:**

saya **memiliki** teman 'friend' (acceptable -> 1 point)
aku **punya** teman (unacceptable -> 0 point)
saya **memiliki** buku (acceptable -> 1 point)
aku **punya** buku (acceptable -> 1 point)

The Euclidean distance between **memiliki** and **punya** is

$$\sqrt{(1-0)^2 + (1-1)^2} = 1$$

Cluster analysis

Figure 1. A dendrogram illustrating the clustering of possessive verbal predicates

ada and ada ...=nya

- **Group 1**

(5-1) Dia **ada** buku. 'S/he has a book'

(5-2) Dia **ada** buku=**nya**. 'S/he has the book'

- **Group 2**

(5-3) Gue udah **ada** istri. 'I already have a wife'

(5-4) Gue udah **ada** istrinya. 'I already have a wife'

- **Group 3**

(5-5) Mereka **ada** rapat. 'They have a meeting'

(5-6) * Mereka **ada** rapatnya.

ber- and ber-...-kan, -an

- Comparing with **ber-Y**, the number of nouns which are considered to be acceptable to fill the Y position in **ber-Y-kan** Z is very few.
- **ber-Y-kan** Z requires an extra argument in addition to a possessee.
- **-an** only accepts very few nouns (jenggotan, jerawat-an, uban-an, karat-an) which have the meaning related to possession.
- **ber-...-kan** and **-an** are peripheral to the domain of possessives in Indonesian.

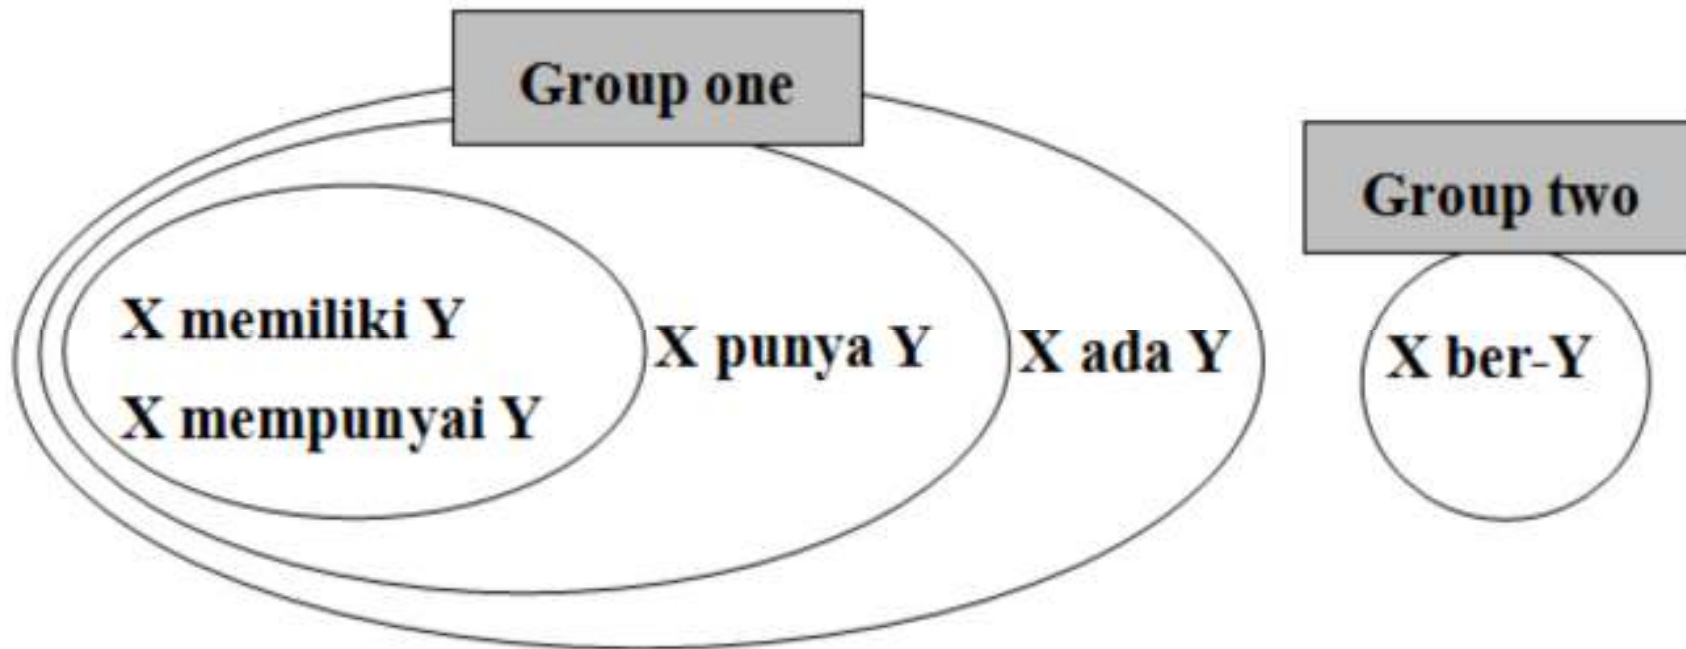

Figure 5. The clustering of memiliki, mempunyai, punya, ada, and ber-

Storytelling survey

Time and place:

- (1) August 2011 in Malang
- (2) Sept-Oct 2011 in Tokyo

Consultants: 24 persons (speaking: 13 + writing: 11) (see Table 5)

What to do: Tell a story by either 'speaking' or 'writing' based on 28 pictures

Spoken Data

ya bahagia lah.

4. Trus dia itu, o: *ada* lagi namanya si e: Anton, Anton, Anton, nah si Anton ini miskin, orang miskin, dia tuh, e: apa, dia itu rumahnya cuman dari atap seng sama kayak dari bambu gitu dindingnya. Trus dah gitu, dia itu punya sepeda pun udah berkarat, udah jelek, trus punya bajunya compang-camping, trus apa, ditambah-tambal gitu, trus nggak punya duit.

5. E: dia itu anak tunggal, cuman papa mamanya udah meninggal, jadi hidup sama neneknya yang sakit, yang punya sakit bronchitis. Trus nggak punya kakak, nggak punya adik, tapi dia punya

13. Terus gitu, si Budinya kan karena anak orang kaya ya, dia punya apa, maunya punya segalanya gitu, harus punya, jadinya tu, dia mau punya, punya si kodok ini e: tapi si Antonnya itu nggak kasih. Si Antonnya bilang, "Ini *punya* saya, bukan *punya* kamu."

14. Terus uda kayak gitu, mereka tarik-tarikan, tarik-tarikan, e: toplesnya jatuh, kebuka tutupnya, e: dia keluar deh si kodoknya.

15. E: dia nemplok di atas kepala gurunya. Ternyata gurunya tu botak tapi dia pake wig gitu.

16. Trus udah kayak gitu, apa, si kodoknya ini e: loncat sambil bawa wignya. Trus si gurunya itu

Written Data

1. Di suatu tempat hiduplah dua orang remaja. Yang bernama si kaya dan si miskin.

2. Si kaya ini memakai kacamata dan berjerawat, tetapi dia sangat kaya. Di rumahnya dia memiliki kolam renang dan sangat banyak baju, celana dan juga sepatu. Dia memiliki mobil dan juga sopir yang siap mengantarkannya ke mana saja.

3. Si kaya ini adalah anak tunggal, dia tidak memiliki adik dan kakak, kakek dan neneknya pun telah meninggal dia hanya tinggal *bersama* ayah dan ibunya, tetapi dia memiliki banyak teman di sekitarnya sehingga dia tidak pernah merasa kesepian.

yang mengidap penyakit bronchitis, dia juga anak tunggal. Ayah dan ibunya telah tiada dan dia tidak memiliki kakak maupun adik. Yang membuat dia tidak kesepian adalah binatang peliharaannya dan ia pun memiliki banyak teman.

6. Si miskin memiliki dua binatang peliharaan yaitu seekor anjing dan seekor katak, tetapi katak ini memiliki keanehan, ekornya sangat panjang dan matanya sangat besar.

7. Suatu pagi saat si miskin *berangkat* ke sekolah dia *bertemu* dengan si kaya yang juga akan ke sekolah.

8. Saat di kelas si miskin *bertanya* kepada si kaya,

Table 10. The number of possessive verbal predicates' tokens and their percentages in the spoken data (L: Low variety, In: Indirect narration, Dn: Direct narration)

Consultant	Percentage of word tokens (see Table 8)	Percentage of L tokens (see Table 8)	memiliki		mempunyai		punya		ada		ada ...-nya		ber-		ber...-kan		Total

Pearson's correlation coefficient

-1 <----- 0 -----> +1

as one variable
increases, the other
decreases, vice versa

correlation
gets
weaker

both variables
increase/decrease
together

Table 7. The Pearson's correlation coefficients between the low variety's tokens and each possessive verbal predicate's tokens in the spoken, written, and overall data

Spoken		Written		Overall	
<i>memiliki</i>	-0.38	<i>memiliki</i>	-0.53	<i>memiliki</i>	-0.57
<i>mempunyai</i>	-0.31	<i>ber-</i>	-0.26	<i>ber-...-kan</i>	-0.29
<i>ber-...-kan</i>	-0.21	<i>ber-...-kan</i>	-0.06	<i>ber-</i>	-0.12
<i>ber-</i>	-0.03	<i>mempunyai</i>	0.11	<i>mempunyai</i>	0.06
<i>ada</i>	0.25	<i>punya</i>	0.25	<i>ada</i>	0.25
<i>ada ...=nya</i>	0.30	<i>-an</i>	0.25	<i>ada ...=nya</i>	0.46
<i>punya</i>	0.78	<i>ada</i>	0.56	<i>-an</i>	0.63
<i>-an</i>	0.93	<i>(ada ...=nya is absent)</i>		<i>punya</i>	0.82

Table 8. The summary of the relationship between possessive verbal predicates and the register

Possessive verbal predicate	Register			
	Hopper (1972)	Alieva (1992)	Moeljadi (2010)	2011 Survey
memiliki		High	High	High
mempunyai	High	High	High	High, Low
punya	Low	Low	Low	Low
ada	-	-	Low	Low
ada ...=nya		-	Low	Low
ber-		-	High	High, Low
ber-...-kan		-	High	High, Low
-an			Low	Low

Some special characteristics of possessive verbal predicates in the corpus

- **memiliki:**
 - OK with almost all types of possessee
 - appears in passive form: (6-1)
 - especially tends to be used when the speaker wants to express her/his intention to possess something: (6-2)
 - may take an inanimate possessor and indicates that the inanimate possessor has something as its part: (6-3)

Some special characteristics of possessive verbal predicates in the corpus

- **mempunyai:**
 - OK with almost all types of possessee
 - appears only once in passive form: (6-4)
- **punya:**
 - may be used without possessor/possessee: (6-5), (6-6)
 - possessee may precede **punya**: (6-7)
 - inanimate possessor: (6-8)

Some special characteristics of possessive verbal predicates in the corpus

- **ada**
 - OK with almost all types of possessee
 - may appear without possessee: (6-9), (6-10)
 - may take an inanimate possessor: (6-11)
- **ada... =nya**
 - only in the spoken data
 - inanimate possessor: (6-12)
 - animate possessor: (6-14), (6-15)
 - inalienable possessee

Some special characteristics of possessive verbal predicates in the corpus

- **ber-**
 - body part or part of a whole as possessee -> inalienable
- **ber-...-kan**
 - only occurs 5 times with *atap* 'roof': (6-16)
- **-an**
 - only with *karat* 'rust' and *jerawat* 'pimples': (6-17), (6-18)

Questions

1. Which possessive verbal predicates can be considered as the real possessive verbal predicates in Indonesian?
2. Does the encoding of possessor and/or possessee play role in the encoding process of possessive verbal predicates?
3. Can we group those possessive verbal predicates?
4. Are there possessive verbal predicates which are commonly used in the high variety and which are often used in the low variety?
5. Is there any special characteristics of possessive verbal predicates in the high and low varieties?

Answers

1. **memiliki, mempunyai, punya, ada**, and **ber-** are in the central domain of Indonesian possessive verbal predicates.
2. The encoding of the **possessee** (not the possessor) affects the acceptability of possessive verbal predicates.
3. **Group 1: memiliki, mempunyai, punya, ada**
Group 2: ber-
4. **High variety: memiliki, mempunyai, ber-**
Low variety: punya, ada, mempunyai, ber-
5. **punya, ada**: may occur without a possessor and/or a possessee
punya: the possessee may precede the verb
